pdfpcnic

A pdfpc-style presenter in the browser

demo deck · press → to start the clock

Two windows

- **Presenter**: clock, current and next slide, notes, thumbnails
- **Audience**: the slide, fullscreen on the projector
- It opens with the deck: press Shift+W for fullscreen

Reveal steps

- First, a point

Reveal steps

- First, a point
- Then another

Reveal steps

- First, a point
- Then another
- And a third: Shift+PageDown skips the rest

Laser pointer

Press [l] and move the mouse over the current slide.

中文备注

备注支持中文和 Markdown。

Notes come from the `.pdfpc` file.

A hidden slide

Marked `hidden` in the `.pdfpc` file: normal navigation skips it.

Thanks

the end slide: backup slides follow

Backup: details

Slides after `endSlide` stay reachable but don’t count in the progress.
